

Park Street, Glace Bay Existing Underpass

*Gary Landry, **exp** Services Inc.*

Existing Underpass

Issues:

Limited access with steps present on both ends of the tunnel

North View

South View

Existing Underpass

Issues:

- **Walking surface subject to ice buildup during the winter.**
- **No barrier between the walking surface in the tunnel and the adjacent water flow channel.**

Existing Underpass

Issues:

- **Walking surface often flooded during periods of high surface water runoff.**

- **No lighting.**

**exp Services Inc.
was retained by the
Cape Breton Regional Municipality
to study the following
three options:**

-- Option 1:

Construct a Wheelchair Accessible Ramp (South Side of Park Street)

-- Option 2:

Perform Upgrades to the Existing Tunnel

-- Option 3:

Construct a New Precast Culvert for Pedestrian Passage

-- Option 1:

Wheelchair Accessible Ramp (South Side of Park Street)

-- Option 1:

Wheelchair Accessible Ramp (South Side of Park Street)

Typical Cross-Section (3.0 m wide path)

Pros:

- User friendly for pedestrians, cyclists and wheelchair accessibility:
 - two cyclists can ride side-by-side;
 - a cyclist can pass two pedestrians; and
 - three pedestrians could walk side-by-side.
- Accessible all year round provided snow removed during the winter months.
- Installation of RA-5 pedestrian signal system will alert the motoring public on Park Street of public crossing.
- Improved overall width of path is 3.0 m compared to the existing walking path width of 1.321 m in the existing tunnel.

-- Option 1:

Wheelchair Accessible Ramp (South Side of Park Street)

Typical Cross-Section (3.0 m wide path)

Cons:

- Several property owners to be consulted with to obtain easement or partial land purchase.
- Minimal traffic disruption on Park Street for this option.
- This option brings users of the path closer to adjacent property owners.

-- Option 1:

Wheelchair Accessible Ramp (South Side of Park Street) Cost Summary:

| Park Street Walking Path Option 1 - Wheelchair Accessible Ramp (South side of Park Street) | | | | | |
|---|--------------------------------------|---------------------|--------------------|---------------------|----------------|
| Item No. | Description | Unit of Measurement | Estimated Quantity | Estimated Unit Rate | Estimated Cost |
| Earthwork and Granular Material | | | | | |
| 1 | Clearing | LS | 1 | \$1,800.00 | \$1,800.00 |
| 2 | Grubbing | m ² | 1,380 | \$4.00 | \$5,520.00 |
| 6 | Common Fill (Borrow) | m ³ | 3,000 | \$10.00 | \$30,000.00 |
| 51 | Gravels | | | | |
| 1 | Type 1 Granular | tonne | 290 | \$20.00 | \$5,800.00 |
| 2 | Type 2 Granular | tonne | 450 | \$19.00 | \$8,550.00 |
| 3 | C4 Stone | tonne | 80 | \$18.50 | \$1,480.00 |
| 3 | Rip Rap (220 - 300 mm) | tonne | 15 | \$30.00 | \$450.00 |
| 53 | Asphalt Concrete | | | | |
| 1 | Type C | tonne | 70 | \$135.00 | \$9,450.00 |
| 62 | Ditching Excavation | m ³ | 200 | \$13.00 | \$2,600.00 |
| 63 | Geotextile | m ³ | 155 | \$4.00 | \$620.00 |
| 75 | Fencing (1.2 m high) | m | 180 | \$75.00 | \$13,500.00 |
| Storm Sewer | | | | | |
| 37 | Culvert Pipe | | | | |
| 1 | 450 mm dia. Concrete Culvert Class 4 | m | 10 | \$300.00 | \$3,000.00 |
| Landscaping | | | | | |
| 70 | Topsoil and Hydroseed | m ² | 955 | \$7.00 | \$6,685.00 |
| 75 | Erosion Control Blanket | m ² | 955 | \$5.00 | \$4,775.00 |
| Additional Items | | | | | |
| 54 | Concrete Curb and Gutter | m | 15 | \$80.00 | \$1,200.00 |
| 55 | Concrete Sidewalk | m ³ | 12 | \$80.00 | \$960.00 |
| 80 | RA-5 Pedestrian Crosswalk | LS | 1 | \$35,000.00 | \$35,000.00 |
| 86 | Bollards | ea | 4 | \$1,200.00 | \$4,800.00 |
| 87 | Removal of Guardrail | LS | 1 | \$1,000.00 | \$1,000.00 |
| 88 | Closing off of Existing Tunnel | ea | 2 | \$1,500.00 | \$3,000.00 |
| 90 | Environmental Protection Allowance | LS | 1 | \$2,000.00 | \$2,000.00 |
| 10 % Contingency: | | | | | \$14,019.00 |
| Subtotal: | | | | | \$134,209.00 |
| HST (15%): | | | | | \$20,131.35 |
| Total | | | | | \$154,340.35 |

Notes:

1. There is no cost in for possible partial land purchases. The following is a breakdown of the approximate area of properties requiring purchase or easement agreements:

| | |
|-------------------------------------|-----------------------------|
| PID 15060601 (ECBC) | 165.0 m ² |
| PID 15411473 (Glen Francis Sparrow) | 442.5 m ² |
| PID 15411515 (Earl Wilson) | 259.9 m ² |
| PID 15411523 (Earl Wilson) | 762.9 m ² |
| PID 15411580 (Christine G. Oldford) | 223.1 m ² |
| Total | 1853.4 m² |

-- Option 2:

Upgrades to Existing Tunnel

OPTION #2
DETAIL SHOWING UPGRADES TO EXISTING TUNNEL WALKWAY

-- Option 2:

Upgrades to Existing Tunnel

Typical Cross-Section (1.5 m wide path)

Pros:

- Improved Access:
 - a cyclist can pass a pedestrian; and
 - two pedestrians can walk side-by-side.
- The risk of flooding the walking area is reduced.
- Barrier separates walking area from the water flow.
- Tunnel is illuminated.
- Least cost to improve access.

-- Option 2:

Upgrades to Existing Tunnel

Typical Cross-Section (1.5 m wide path)

Cons:

- Walking path width in tunnel has improved slightly, but remains below a desired minimum width of 2.5 m for comfortable lateral clearances for intended use.
- There still remains the potential for periodic flooding of the walking area in the tunnel during extended periods of rainfall, but the frequency of such events will be reduced due to the tunnel modifications.

-- Option 2:

Upgrades to Existing Tunnel

Cost Summary:

| Park Street Walking Path Option 2 - Upgrades to Existing Tunnel | | | | | |
|--|------------------------------------|---------------------|--------------------|---------------------|----------------|
| Item No. | Description | Unit of Measurement | Estimated Quantity | Estimated Unit Rate | Estimated Cost |
| Sanitary Sewer | | | | | |
| 27 | New Catch Basin Cover | ea | 2 | \$1,500.00 | \$3,000.00 |
| 28 | Extend Existing Manholes | ea | 2 | \$1,500.00 | \$3,000.00 |
| Earthwork and Granular Material | | | | | |
| 51 | Gravels | | | | |
| | .1 Type 1 Granular | LS | 6 tonnes | \$500.00 | \$500.00 |
| | .2 Type 2 Granular | LS | 12 tonnes | \$500.00 | \$500.00 |
| | .3 Rip Rap (220 - 300 mm) | LS | 10 tonnes | \$1,000.00 | \$1,000.00 |
| Street Construction | | | | | |
| 62 | Cast-in-Place Concrete | m ³ | 20 | \$800.00 | \$16,000.00 |
| 63 | Adhesive Anchors | ea | 190 | \$25.00 | \$4,750.00 |
| 64 | Concrete Repairs | LS | 1 | \$12,000.00 | \$12,000.00 |

| Landscaping | | | | | |
| 70 | Remove and Dispose of Steps | LS | 1 | \$2,000.00 | \$2,000.00 |
| Additional Items | | | | | |
| 85 | Steel Deck (galvanized) | m ² | 55 | \$30.00 | \$1,650.00 |
| 87 | Steel Angle (galvanized) | kg | 270 | \$7.00 | \$1,890.00 |
| 88 | Steel Handrail (galvanized) | m | 40 | \$300.00 | \$12,000.00 |
| 89 | Lighting | LS | 1 | \$35,600.00 | \$35,600.00 |
| 90 | Environmental Protection Allowance | LS | 1 | \$2,000.00 | \$2,000.00 |
| 10 % Contingency: | | | | | \$9,679.00 |
| Subtotal: | | | | | \$106,469.00 |
| HST (15%) | | | | | \$15,970.35 |
| Total | | | | | \$122,439.35 |

- - Option 3:

New Precast Culvert For Pedestrian Passage

OPTION #3
NEW PEDESTRIAN TUNNEL WALKWAY

-- Option 3:

New Precast Culvert For Pedestrian Passage

Typical Cross Section (2.7 m wide path)

Pros:

- New tunnel with a path width of 2.7 m is user friendly enabling:
 - two cyclists can ride side-by-side;
 - a cyclist can pass two pedestrians; and
 - three pedestrians could walk side-by-side.
- Improved access by avoiding the narrow existing tunnel and traffic movements on Park Street.
- No risk of flooding.
- Tunnel is illuminated.
- Minimal impact to adjacent property owners.

-- Option 3:

New Precast Culvert For Pedestrian Passage

Typical Cross Section (2.7 m wide path)

Cons:

- Most expensive option.
- Will result in closure of Park Street to facilitate the major excavation required to install precast culvert sections and re-route sewer system.
- Several property owners to be consulted with to obtain easements or partial land purchases.
- Re-alignment of a portion of the sanitary system is required.

-- Option 3:

New Precast Culvert For Pedestrian Passage

Cost Summary

| Park Street Walking Path Option 3 - New Precast Culvert for Pedestrian Passage | | | | | |
|---|--|---------------------|--------------------|---------------------|----------------|
| Item No. | Description | Unit of Measurement | Estimated Quantity | Estimated Unit Rate | Estimated Cost |
| Earthwork and Granular Material | | | | | |
| 1 | Clearing | LS | 1 | \$2,000.00 | \$2,000.00 |
| 2 | Grubbing | m ³ | 500 | \$4.00 | \$2,000.00 |
| 5 | Mass Excavation - Unsuitable Material | m ³ | 2,000 | \$15.00 | \$30,000.00 |
| 51 | Gravels | | | | |
| 1 | Type 1 Granular | tonne | 250 | \$20.00 | \$5,000.00 |
| 2 | Type 2 Granular | tonne | 460 | \$19.00 | \$8,740.00 |
| 3 | P3 Run Granular | tonne | 4,255 | \$18.00 | \$76,590.00 |
| 4 | Rip Rap (220 - 300 mm) | tonne | 220 | \$30.00 | \$6,600.00 |
| 53 | Asphalt Concrete | | | | |
| 1 | Type C | tonne | 35 | \$160.00 | \$5,600.00 |
| 54 | Curb and Gutter | m | 50 | \$80.00 | \$4,000.00 |
| 55 | Sidewalk | m ² | 45 | \$80.00 | \$3,600.00 |
| Water Main | | | | | |
| 11 | Support of 200 dia. Water Main | LS | 1 | \$3,000.00 | \$3,000.00 |
| Sanitary Sewer | | | | | |
| 21 | 380 dia. Sanitary Pipe | m | 35 | \$300.00 | \$10,500.00 |
| 23 | Manhole | ea | 1 | \$2,500.00 | \$2,500.00 |
| 25 | Connection to Existing Manhole | ea | 1 | \$1,000.00 | \$1,000.00 |
| 27 | Remove 380 dia San. Pipe and Plug Manholes | LS | 1 | \$3,000.00 | \$3,000.00 |
| Storm Sewer | | | | | |
